5. Various treatment options available
6. Complications associated with SFA intervention

COURSE COMPONENTS
You may start any section within the course and return later to complete at your leisure. Course content is available for review on the MSC website for one year following completion of the course.

COURSE:
1. Introduction/Objectives
2. Introduction to PAD
3. Etiology
4. Prevalence
5. The Patient
6. SFA Disease
7. The SFA
8. Diagnostic Exams
9. Vascular Access
10. Crossing Over
11. Procedural Technique
12. Complex Variables
13. Potential Complications
14. Chronic Total Occlusions
15. Equipment
16. Author Biography
17. Course Map

FEATURES AND BENEFITS
» Convenience and flexibility: available anytime, anywhere
» Self-paced, consistent, interactive learning
