Institute of Medical Emergency Preparedness Announces Partnership with Medical Simulation Corporation

HATTIESBURG, MS and DENVER, CO —June 29, 2010 — The Institute of Medical Emergency Preparedness (IMEP) today announced today that it has partnered with Medical Simulation Corporation (MSC) to provide the MSC Moderate Sedation Course and IMEP Sedation Emergency Algorithms to help better prepare healthcare providers caring for patients undergoing procedures using moderate sedation: the **Moderate Sedation Plus Airway Emergency and Sedation Algorithms Course**.

IMEP and MSC will offer this course as an online sedation emergency preparedness training program that is designed to prepare healthcare professionals and their office teams to respond calmly, efficiently and effectively to a sedation or airway emergency. This program will be unique in that it will cover moderate sedation plus emergencies that can occur such as airway emergencies and sedation emergencies through a multi-media interactive simulation program that will be on MSC website. A training certificate will be issued for those that complete the course.

“MSC is pleased to partner with the Institute of Medical Emergency Preparedness to ensure that healthcare providers in inpatient and outpatient clinical settings are prepared to prevent and address potential complications associated with moderate sedation,” says Ellen Mouton, MSC Business Development Director.

“Our partnership with Medical Simulation Corporation will elevate professional standards for any healthcare provider participating in our courses to improve patient safety, patient rescue and continued due-diligence in the area of medical and sedation emergency preparedness,” said John Roberson, D.M.D., the Chief Executive Officer of IMEP. He added, “By partnering with IMEP, Medical Simulation Corporation is demonstrating their commitment to improving and preparing all healthcare providers for the

inevitable medical, sedation or airway emergency. We are truly honored that Medical Simulation Corporation has taken this next step to demonstrate this kind of commitment to anesthesia-based emergency preparation.”

Chris Rothman, D.D.S., IMEP’s Chief Operating Officer, “This is a perfect example of what can be achieved when two companies of this caliber come together for the greater good of all healthcare providers. The person that benefits the most is the patient they treat. We believe every healthcare provider who participates in the IMEP/MSC courses will better prepare their facility, their staff and themselves. We applaud MSC for taking this significant stance on sedation emergency preparedness.”

About The Institute of Medical Emergency Preparedness

The Institute of Medical Emergency Preparedness is an innovative leader helping healthcare professionals and their team members prepare for medical emergencies by making medical emergency preparedness a core competency in every healthcare office. The IMEP is recognized by national and state organizations and associations across the United States as a preferred provider of medical emergency preparedness training.
